

### What is AEO certified:

AEO means Authorized Economic Operator. It's authorized by one custom and mutual acknowledged by other countries' custom. Now Chinese AEO certification has been mutual acknowledged by 21 economic body and 47 countries including EU, Singapore, Japan, Australia, Switzerland, etc., and the list is expanding.

### How to get AEO certification in China:

The Chinese custom will perform an on-site inspection. The inspection covering: company management, financial situation, operation control, compliance of law and custom regulations, risk management on intelligence system, digital data, partner's selection and control, products, transportation & quality etc. It means that the custom consider that AEO certified company are healthy, compliance, efficient risk control on all business management.

Product range: All the products related on importing or exporting are covered.

### Added value:

#### 1. In Chinese custom:

Chinese custom will give us priority of the custom clearance, simplified process & lower custom inspection rate comparing to non-certified company for both exporting and importing.

#### 2. In destination custom:

If the destination country has mutual acknowledgement with China, the destination custom will give priority of the treatment, simplified process and lower custom inspection rate.

In general, it will fast the custom clearance process for both HFM and customers, which means time and cost saving, less delay possibility due custom issue.
